## The Saucy Fish Company, Grimsby

### Fast-cure flooring solution for fish processing area

Our reference in Grimsby (United Kingdom): The Saucy Fish Company

#### The background

The Saucy Fish Co. operates a very busy fish processing and added-value product line. The client had an existing concrete slab which was smooth and, in parts, breaking up. A food-grade anti-slip floor was needed which would not contaminate the surrounding production environment with any odour.

#### The challenge

The first phase of 200m<sup>2</sup> involved production ceasing at 4pm on a Saturday, with cleaning down taking until 8pm. The area was to be back in production at 6am on Sunday. The environment was still wet and the window to lay onto damp concrete was 10 hours.

## Fast-cure flooring solution for fish processing area

Our reference in Grimsby (United Kingdom): The Saucy Fish Company

### Our solution

Grimsby Resin Flooring arrived and set up their mixing station; they also tented off and secured an enclosed environment so that no dust would escape and used mechanical preparation equipment fitted with vacuums to extract the dust. They surface-dried the area and then applied the Ucrete PFS at a temperature between 8-10°C, which had cured after four hours. They then applied 9mm of UD200 fast flooring and this cured in less than five hours.

### Benefits to the customer

- Master Builders Solutions met a small window of opportunity for application and the client's requirement for an antislip floor finish with the same cleanability as stainless steel.
- The Ucrete floor was applied to a damp substrate directly with no issues regarding the relative humidity moisture content of the slab and no requirement for a surface damp-proof membrane.
- The client's floor was prepared, primed, laid and back in service within a 10-hour period with no issues or effect on the surrounding production.
- Seachill's Engineering Manager, was very pleased with Hull Resin Flooring and the Ucrete fast flooring solution as he recognised there had been a problem with this floor area for a while but had not realised there was a solution available to him on the market that met his time constraints.
- As a result, Seachill planned to programme in the remaining areas in the production facility to be installed in the same way.

### Projects facts at a glance

- Fast-cure system installed within a 10-hour window
- Cleanability and anti-slip finish achieved
- Application to a damp substrate without a surface DPM
- Grimsby Resin Floors applied up to 2500m<sup>2</sup> of flooring

### Master Builders Solutions by MBCC Group

The Master Builders Solutions brand expresses MBCC Group's expertise in providing customized chemical solutions for new construction, maintenance, repair and restoration of structures.

Master Builders Solutions is built on the experience gained from more than a century in the construction industry. At the core of the Master Builders Solutions brand is the combined know-how and experience of a global community of construction experts, who connect with you to solve all of your construction challenges.
