Ahmed Gunter

The background

Beyti is one of the market leader of food and beverage sector located in Nubaria, the customer is producing milk, yogurt and juices and he is expanding to build new extensions. They decide to use Ucrete for their new juice factory because it is very tough flooring material which can support all exposed conditions.

The challenge

- Very tough environment, totally wet, heavy traffic regarding the fork lift and the steel pallets that they used in this industry.
- Very hygienic environment to meet the health and safety company precaution as they are the highest standard company in Egypt at this business.

Project profile: Heavy Duty flooring systems

Our solution

Master Builders Solutions Construction Chemicals advised Ucrete UD200 - 6mm a heavyduty polyurethane concrete overlay system which hygiene and can resist the hand lifts and for klifts traffic

We offered the whole system including the sealant and the coving

Customers Benefit

The customer was very satisfied from our solution and after three years of material application we didn't apply any floor maintenance

Project facts at a glance:

- Very taught high resistance traffic
- Totally hygiene.
- Good looking floor
- Long lasting one.
