## MasterSeal ${ }^{\circledR}$ SL 189

## Ultra-low modulus silicone sealant for concrete to concrete / concrete to asphalt and asphalt to asphalt pavement joints

## DESCRIPTION

MasterSeal SL 189 is a high performance one component, moisture curing, silicone construction sealant. In properly designed and constructed joints the product has been formulated to offer ultra-low modulus, fuel and UV resistant, elastomeric seal. Asphaltic paving materials have low tensile strengths. It is important to use an ultra-low modulus material when sealing these substrates to ensure minimal strain is placed on the asphaltic joint face.

## TYPICAL USES

MasterSeal SL 189 has been developed specifically for sealing dynamically moving joints such as; expansion and control joints.
MasterSeal SL 189 can be used to seal irregularly shaped and spalled joints.
MasterSeal SL 189 sealing sawcut openings used to encapsulate and seal sensitized wiring loops for control of traffic signals, traffic counters, parking lot gates, ticket dispensers, and other similar equipment. It is also excellent for use in sealing light cans and electrical cable used in airport runway lighting.

## ADV ANTAGES

- Cold-applied, ready-to-use
- Ultra-low modulus, durable resilient seal
- Fuel-resistant
- Primer free, save labor and time
- Faster skin-over time, quick open to traffic
- Flows in to irregular joint widths, No tooling
- Wide application temperatures: $-29^{\circ} \mathrm{C}$ to $48^{\circ} \mathrm{C}$

## PACKAGING

MasterSeal SL 189 is supplied in 600 ml sausage and 857 ml cartridge, bulk pack on request.

## STANDARDS

Conforms to ASTM D5893 Type SL Conforms to SS-S-200E (section 4.4.12) Flame test requirement

Confirms to FAA P-605 for silicone joint sealants Conforms to ASTM C920 Type S, Grade P, Class $100 / 50$, use T .

## APPLICATION

## Preparation:

To ensure excellent adhesion the joint profile including the arises should be clean, sound, dry and free from any loosely adherent material which could prevent adequate bond to the substrate.

MasterSeal SL 189 should never be applied to damp or wet concrete or asphalt or installed during inclement weather.

## MasterSeal ${ }^{\circledR}$ SL 189

## Application:

Using a manual or air-operated gun, install MasterSeal SL 189 from cartridge into the joint. Fill from the bottom up to within 3 mm of the roadway. Where required, strike off just below surface level and remove any excess material. For detailed, recommended surface preparation and installation procedures, refer to MasterSeal SL 189 method statement.

## LIMITATIONS

MasterSeal SL 189 is not recommended for continuous water immersion. It should not be applied in totally confined spaces where the sealant is not exposed to atmospheric moisture.

Contact Master Builders Solutions prior to specifying for or installing in airfield runway applications.
