Hall & Woodhouse Brewery, Dorset

Flooring solution for upgrade of existing brewery

Our reference in Dorset, United Kingdom: Hall and Woodhouse Brewery

The background

The Hall & Woodhouse Brewery was founded in 1777 by Charles Hall in Blandford Forum, Dorset. It is a family-owned brewery and operates over 230 public houses stretching from Bristol to Exeter and London to Brighton in the South of England under the trading name of Badger Brewery.

The challenge

The upgrading of the Hall & Woodhouse brewery was an exciting project and the first new brewery the company has built since 1899.

The new £5million brewhouse was designed to produce 12 beers with room for future growth. As such, it required a safe, non-tainting, heavy duty flooring system with excellent heat, chemical and impact resistance.

Hall & Woodhouse Brewery, Dorset

Flooring solution for upgrade of existing brewery

Our solution

The floor surfaces chosen for the project were Ucrete HPQ heavy duty polyurethane coloured quartz screed and Ucrete UD200 heavy duty polyurethane screed.

The Ucrete materials were chosen due to their high chemical, abrasion and slip resistance properties, whilst the thermal resistance (80°C at 6mm and 120°C at 9mm) made them an ideal solution for the harsh environment of a brewery.

The first phase completed by Licensed Ucrete Applicator Ancorite, which applied in excess of 1,500m² of Ucrete HPQ and UD200, whilst in the second phase a further 1800m² of Ucrete UD200 was laid by Polydeck Resins, another Licensed Ucrete Applicator.

Ucrete hygienic floors provide ideal floor finishes for many industries, particularly in the food, beverage, chemical and pharmaceutical sectors. They offer a uniform and seamless flooring system that creates a safe and attractive working environment. Dense and impervious, Ucrete surfaces retain their integrity at temperatures of up to 130°C, and have been proven to meet the most stringent hygiene and cleanliness requirements where a long lasting robust floor is crucial. For employee safety, a wide range of slip resistant profiles are available.

Benefits to the customer

- Licensed contractors for quality assurance
- Tried and tested flooring systems with a track record
- Systems ideal for harsh environments

Projects facts at a glance

- Ucrete HPQ and Ucrete UD200 flooring systems
- High chemical, slip and thermal resistance essential
- Heavy duty polyurethane screeds

Master Builders Solutions by MBCC Group

The Master Builders Solutions brand expresses MBCC Group's expertise in providing customized chemical solutions for new construction, maintenance, repair and restoration of structures.

Master Builders Solutions is built on the experience gained from more than a century in the construction industry. At the core of the Master Builders Solutions brand is the combined know-how and experience of a global community of construction experts, who connect with you to solve all of your construction challenges.
