Tomlinson Dairies, Wrexham

Flooring solution for short timescale in dairy production area

Our reference in Wrexham (United Kingdom): Tomlinson Dairies

The background

Founded in 1983, Tomlinson Dairies started out as a doorstep delivery milk service. Its reputation for quality and service led to an increase in demand and, as a result, it built a dedicated dairy next to its farm.

Now producing over 25 million litres of fresh milk a year and supplying over 300 outlets across Wales, the Midlands and the North West of England, the dairy needed an increase in its production capacity. This led to the company investing in a brand new dairy with Master Builders Solutions being asked to provide suitable flooring solutions.

The challenge

During operation, dairies are usually wet and slippery and products are very susceptible to tainting. As such, the new dairy required a safe, non-tainting, heavy duty flooring system with excellent heat, chemical and impact resistance.

The need to bring the new facility into production as soon as possible meant that the project had a very tight construction schedule.

Flooring solution for short timescale in dairy production area

Our reference in Wrexham (United Kingdom): Tomlinson Dairies

Our solution

Over 5000m² of Ucrete UD200 was applied, with Ucrete RG also applied to the skirting. Following the successful installation in the main production areas, Master Builders Solutions were asked to return to provide a similar flooring solution in the new yogurt production facility.

The customer's benefit

- Master Builders Solutions and Kemtile met the short timescale for application and the client's requirement for an anti-slip floor finish with the same cleanability as stainless steel
- Tried and tested flooring systems with a proven track record within the dairy industry
- Ucrete UD200 flooring's combination of durability, speed of cure and ease of cleaning with temperature resistance up to 150°C are a unique offering meeting the demands of this project.

Projects facts at a glance

- Fast-cure system installed within a 10-hour window
- Cleanability and anti-slip finish achieved
- High chemical and slip resistance were key factors in Ucrete's specification at Tomlinsons Dairies

Master Builders Solutions by MBCC Group

The Master Builders Solutions brand expresses MBCC Group's expertise in providing customized chemical solutions for new construction, maintenance, repair and restoration of structures.

Master Builders Solutions is built on the experience gained from more than a century in the construction industry. At the core of the Master Builders Solutions brand is the combined know-how and experience of a global community of construction experts, who connect with you to solve all of your construction challenges.
