**Total application area:**  
*3200 m<sup>2</sup>*

## Dubai World Trade Centre Kitchen Prestigious Floors

### The background

In 2002 this 3200 m<sup>2</sup> Ucrete® project was not only the biggest at the time but also the most prestigious. Dubai World Trade Centre is an iconic development in the United Arab Emirates attracting millions to numerous exhibitions held throughout the year. The client wanted a durable and robust floor, suitable for large busy kitchen environments, as well as an applied system that met all necessary municipal approvals.

### The challenge

The application had to be completed within three months. Back in 2001 Al Bahar and Bardawil had to undergo intensive training to hone their skills and together with a small team of men, was a mammoth task to complete successfully within the defined period.

# Dubai World Trade Centre Kitchen

## Prestigious Floors

### Our solution

Because of Master Builders Solutions' proven track record in Europe and positive feedback from end users, Dubai World Trade Centre felt that Ucrete® best met its needs and requirements as a solution to its high performance requirements for an extremely busy kitchen.

### The customer's benefit

At the time of completion (2001/2002) the Client expressed enormous satisfaction for the high standard of finish especially joint and drainage detail. The head Chef Mr. Oberender commends the Dubai World Trade Centre for their choice and faith in the Ucrete® system stating that "twelve years after installation the floor not only looks new but continues to perform in the most demanding circumstances".

### Projects facts at a glance

- Durable
- Easy to clean
- Fit for purpose

### Master Builders Solutions

The Master Builders Solutions brand brings all of expertise together to create chemical solutions for new construction, maintenance, repair and renovation of structures. Master Builders Solutions is built on the experience gained from more than a century in the construction industry.

The know-how and experience of a global community of construction experts form the core of Master Builders Solutions. We combine the right elements from our portfolio to solve specific construction challenges. We collaborate across areas of expertise and regions and draw on the experience gained from countless construction projects worldwide. We at Master Builders Solutions leverage global technologies, as well as our in-depth knowledge of local building needs, to develop innovations that help make more successful and drive sustainable construction.
