Heavy Duty Colour Stable Flooring for Enhanced Aesthetics

Ucrete CS is a range of defined profile colour stable floors, ideal for environments that require a high-grip, slip resistant, safe, aesthetic floor. Ucrete CS has enhanced resistance to discoloration from chemical staining or ultraviolet light. It is available in a range of surface profiles and thickness specifications.

Slip Resistance

Ucrete CS systems consist of three surface textures, CS10, CS20, and CS30, which can be installed at thicknesses of 4, 6 or 9 mm depending upon the service conditions. The antistatic versions Ucrete CS10AS and CS20AS complete the range.

Hygiene

There is no need to compromise on aesthetics or hygiene when looking for slip-resistant flooring, Ucrete CS systems offer R12 and R13 profiled floors that can be cleaned to the same standard as stainless steel, and do not support biological growth so helping to maintain hygiene standards.

Effective cleaning regimes will enhance the life and appearance of your floor. The use of Ucrete CS floors will significantly reduce the amount of chemical staining observed in aggressive production environments.

Aesthetics

You may need a highly profiled floor because of heavy grease contamination during the course of the day, but the factory floor should still look good when customers come to visit. Ucrete CS systems offer the slip resistance you need, are easy to clean and have the aesthetics you want. Colours that won't fade or yellow, that resist staining and provide a bright, safe and attractive working environment for the life of the floor.

Cleaning and Stain Resistance

Ucrete CS is a colour stable, UV resistant flooring solution with enhanced stain resistance with all the Ucrete benefits.

Long-term performance:

There are many 20 – 30-year-old Ucrete floors in aggressive environments still in service.

Fast application and curing:

Even at low temperatures. Specifications are available that are fully serviceable after only 5 hours at 10°C, making it ideally suited for refurbishment work.

Moisture tolerant:

Can be installed onto 7-day-old concrete without the need for special primers, helping to stay on schedule on fast-track projects.

Thermal-shock resistance:

Withstands spillages up to 120 °C depending upon specification.

Chemical resistance:

From strong acids to alkalis, fats, oils and solvents which can rapidly degrade other types of resin flooring.

Non tainting:

Ucrete CS floors are non tainting after 5 hours as tested by Campden BRI.

Extended Range of Colours

An extended range of colour-stable light and pastel shades are available to enhance the aesthetics of your workplace. Ucrete CS systems are resistant to discoloration due to staining or ultraviolet light.

The Key Benefits of Ucrete CS at a Glance

- Colour stability
- UV resistance
- Enhanced stain resistance
- Improved colour range
- Fast application and speed curing
- Moisture tolerance
- Thermal shock resistance
- Chemical resistance
- Long-term performance

Master Builders Solutions

The Master Builders Solutions brand brings all of our expertise together to create chemical solutions for new construction, maintenance, repair and renovation of structures. Master Builders Solutions is built on the experience gained from more than a century in the construction industry. The know-how and experience of a global community of construction experts form the core of Master Builders Solutions.

We combine the right elements from our portfolio to solve your specific construction challenges. We collaborate across areas of expertise and regions and draw on the experience gained from countless construction projects worldwide. We leverage global technologies, as well as our in-depth knowledge of local building needs, to develop innovations that help make you more successful and drive sustainable construction.

The comprehensive portfolio under the Master Builders Solutions brand encompasses concrete admixtures, cement additives, solutions for underground construction, waterproofing solutions, sealants, concrete repair & protection solutions, performance grouts performance flooring solutions and solutions for on- and offshore wind energy.

Our comprehensive portfolio

- Concrete admixtures
- Cement additives
- Chemical solutions for underground construction
- Waterproofing solutions
- Sealants
- Concrete repair and protection solutions
- Performance grouts
- Wind turbine grouts
- Performance flooring solutions

Master Builders Solutions for the Construction Industry

MasterAir®

Complete Solutions for air entrained concrete

MasterBrace®

Solutions for strengthening and structural adhesives

MasterCast®

Solutions for the manufactured concrete product industry

MasterCell®

Density reducing admixtures

MasterCem®

Solutions for cement manufacture

MasterEase®

Solutions for low viscosity concrete

MasterEmaco®

Solutions for concrete repair

MasterFiber®

Comprehensive solutions for fiber reinforced concrete

MasterFinish®

Solutions for formwork treatment

MasterFlame®

Passive fire protection system

MasterFlow®

Solutions for precision grouting

MasterGlenium®

Hyperplasticizer formulated from state-of-the-art polymers for the ultimate performance

MasterInject®

Solutions for concrete injection

MasterKure®

Solutions for concrete curing

MasterLife®

Solutions for enhanced durability

MasterMatrix®

Advanced rheology control solutions

MasterPolyheed®

High-performance superplasticizer

MasterPozzolith®

Solutions for water-reduced concrete

MasterProtect®

Solutions for concrete protection

MasterRheobuild®

Superplasticizer for concrete

MasterRoc®

Solutions for underground construction

MasterSeal®

Solutions for waterproofing and sealing

MasterSet®

Solutions for set control

MasterTile®

Solutions for tiling systems

MasterTop®

Solutions for industrial and commercial floors

MasterWeld™

Adhesive Solutions for construction

MasterX-Seed®

Advanced accelerator solutions for concrete

Ucrete®

Flooring solutions for harsh environments
