

Finestone Stucco Systems Acceptable Stucco Bases

Finestone provides proven Stucco Systems for building exteriors through its Wall Systems portfolio. Master Builders Solutions supports the use of any stucco base conforming to ICC-ES AC11 (including but not limited to StuccoBase & StuccoBase Premix by Master Builders Solutions) in any Finestone Stucco System. Furthermore, use of third-party ICC-ES AC11 conforming stucco base materials will not affect the issuance of a Finestone Stucco System warranty. As part of that warranty, Master Builders Solutions will warrant the performance of our materials, however any performance issues attributed to the third-party stucco base would need to be addressed by the stucco base manufacturer.

Master Builders Solutions does not qualify product compliance, to determine ICC-ES AC11 compliance. Please contact the stucco base manufacturer or visit the evaluation services websites listed below:
