the fire conditions.  
Containers may rocket or explode in heat of fire.  
Keep containers cool by spraying with water if exposed to fire.  
Collect contaminated extinguishing water separately, do not allow to reach sewage or effluent systems.  
Contaminated extinguishing water must be disposed of in accordance with official regulations.

Special protective equipment : Wear a self-contained breathing apparatus.  
for fire-fighters

**SECTION 6. ACCIDENTAL RELEASE MEASURES**

Personal precautions, protective equipment and emergency procedures : Can release flammable vapours.  
Avoid all sources of ignition: heat, sparks, open flame.  
Use antistatic tools.  
Do not breathe vapour/aerosol/spray mists.  
Use personal protective clothing.

Environmental precautions : Contain contaminated water/firefighting water.  
Do not discharge into drains/surface waters/groundwater.

Methods and materials for containment and cleaning up : Contain spillage, and then collect with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and place in container for disposal according to local / national regulations (see section 13).  
See user defined text.

**SECTION 7. HANDLING AND STORAGE**

Advice on protection against fire and explosion : Keep away from open flames, hot surfaces and sources of ignition.  
Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapors).  
Substance/product can form explosive mixture with air.  
Use only explosion-proof equipment.

Advice on safe handling : Take precautionary measures against static discharges.  
Keep away from sources of ignition - No smoking.  
Provide good room ventilation even at ground level (vapours are heavier than air).

Conditions for safe storage : Keep only in the original container in a cool, dry, well-ventilated place away from ignition sources, heat or flame.  
Keep tightly closed.  
Protect from direct sunlight.
