

MasterSeal Fast Cure Traffic Systems

MasterSeal[®] 2850 & MasterSeal[®] 2900

Very fast curing methyl methacrylate / polyurethane waterproofing systems for traffic bearing areas that demand exceptional protection and superior long-term durability in challenging conditions

PRODUCT BENEFITS

- Fast return to service – open projects quickly by reducing shutdown time
- Innovative waterproofing technology – delivers superior long-term durability
- Can be applied at temperatures below 20 °F – allows for project continuation in colder months
- Customizable topcoat – available in a variety of standard colors
- Two options for total system cure time – provides project flexibility
- Simple to understand – allows for quality installations and reduced callbacks

INDUSTRIES / APPLICATIONS

Excellent protection for traffic areas such as:

- Entrance/exit ramps
- Helixes
- Ticket spitter areas
- High turn radiuses
- Snow plowed decks
- Loading docks
- Garbage rooms
- Balconies
